

Rabbit Monoclonal Antibody to Human Vimentin

Catalog No.:	RMPD 019
Intended Use:	This product is intended for qualitative immunohistochemistry with normal and neoplastic formalin-fixed, paraffin-embedded tissue sections, to be viewed by light microscopy. Clinical interpretation of staining results should be accompanied by histological studies with proper controls. Patients' clinical histories and other relevant diagnostic tests should be utilized by a qualified person(s) when evaluating and interpreting results.
Immunogen:	Recombinant human vimentin protein.
Clone:	SP20
Isotype:	IgG
Format:	This antibody has been pretitered and quality controlled to work on formalin-fixed paraffin-embedded and acetone fixed cryostat tissue sections. No further titration is required.
Staining Protocol:	We suggest an incubation period of 30 minutes at room temperature. Optimal incubation conditions should be determined by the user based upon the fixation conditions and staining system employed. No pretreatment is required for formalin fixed paraffin tissue sections.
Specificity:	This antibody recognizes vimentin, the main intermediate filament protein in mesenchymal cells. It is of value in the differential diagnosis of undifferentiated neoplasms. This antibody crossreacts with Human.
Positive Control:	Sarcomas
Cellular Localization:	Cytoplasmic
Storage:	Store at 2-8°C. Do not use beyond the expiration date stated on the label.

IVD: For In Vitro Diagnostic Use
