

Rabbit Polyclonal Antibody to Herpes Simplex Virus type I I

Catalog No.:	RP 019, RP 019-05
Applications:	Analyte Specific Reagent. Analytical and Performance characteristics are not established. Optimal working conditions must be determined by the end user.
Immunogen:	Whole rabbit corneal cells, infected with herpes simplex virus type II (strain M5), were solublized with detergent.
Host:	Rabbit
Format:	Purified immunoglobulin fraction of rabbit antiserum against herpes simplex virus type II containing sodium azide as a preservative.
Specificity:	This antibody reacts with HSV type II specific antigens and with antigens common to HSV type I and II virus. It reacts with all of the major glycoproteins present in the viral envelop and with at least one core protein.
Positive Control:	Infected tissue
Cellular Localization:	Cytoplasmic, nuclear
Storage:	Store at 2-8°C. Do not use beyond the expiration date stated on the label.
